Sample weekly study and research report

2026-09-28 to 2026-10-04 | Weekly study and research

Weekly summary

Fictional demonstration. This week combines coursework requirements with a research meeting and reading notes. Next week: finish the report outline and check the experiment setup.

Taught courses

2026-09-28 09:00-11:00 | Software Engineering (Demo room A)

2026-09-29 15:30-17:00 | Linear Algebra (Demo room B)

2026-09-30 09:00-11:50 | Computer Networks (Demo room C)

2026-10-02 14:00-16:00 | Software Engineering (Demo room A)

Selected learning records

Requirements report checklist

2026-09-28 | Assignment requirement | Software Engineering | In progress

Describe the student workflow, keep requirement identifiers consistent, and link each accepted feature to its source question. This is fictional demonstration content.

Review scope / 复习范围

2026-09-29 | Exam scope | Linear Algebra | Not started

Review matrices, vector spaces and the worked examples from the practice sheet.
复习时标出不理解的步骤，下次课集中提问。 Fictional study note.

Meeting notes: baseline experiment

2026-10-01 | Research meeting | Demo research project | Completed

Compare two small baseline settings and record the data split. Keep the unsuccessful run in the log. Next step: check whether the preprocessing is consistent. Fictional research example.

Reading notes and follow-up

2026-10-02 | Reading / experiment | Demo research project | In progress

Read the methods section and list the assumptions that affect our experiment. Prepare one question for the next meeting. Fictional research example.
